

Trusted Cybersecurity Professionals For Over 37 Years

SMB Cybersecurity Essentials

Practical cybersecurity, privacy, and compliance support for small and midsize businesses. JANUS Associates helps SMBs reduce cyber risk with a focused, affordable service that improves cyber resilience. This unique 10-point program is affordable and easy to implement.

The JANUS Approach

Small and midsize organizations are busy enough managing day-to-day operations. The last thing you need is added uncertainty around cybersecurity, privacy, and regulatory compliance. What you need is clear priorities, independent guidance from subject matter experts, and access to experienced security professionals who can identify and act on real issues that internal teams and MSPs often miss.

JANUS delivers an affordable, structured monthly program that closes operational gaps, improves cyber hygiene, and combines operational visibility, workforce awareness, and expert access in a single engagement. It's a comprehensive, easy-to-use program that strengthens every layer of SMB information security.

JANUS SMB Core Services include:

Proven Partnership Model

JANUS Associates has spent over three decades helping public and private sector organizations reduce risk and strengthen resilience against evolving cyber threats. As an independent firm, JANUS is not tied to any product or technology vendor, giving clients unbiased, practical guidance grounded in real-world experience rather than sales incentives. This long-standing track record means SMB clients get the same depth of expertise that JANUS brings to larger enterprise and government engagements, scaled to fit the budget and pace of a growing business. The result is a security program built for lasting resilience, not just a one-time fix.
